

TuffDrive® eUSB

eUSB 10-pin and Keys

8GB - 64GB

Industrial Embedded Technology for an Interconnected World

TuffDrive eUSB 10-pin modules and keys are ideal solutions for applications that utilize chipsets that may not have a SATA interface

Designed, programmed, built and supported in the U.S. - fortified by locations worldwide.

Overview

Virtium's TuffDrive® eUSB 10-pin modules and keys provide high reliability and targeted storage for server, networking, embedded, and industrial applications. They feature the widely supported USB 2.0 and 3.0 interfaces, ensuring compatibility with countless systems.

Virtium backs its world-class storage products with a fiveyear warranty and delivers the longest product life cycles in the industry.

Applications

TuffDrive eUSBs are ideal solutions for operating system and file storage and system level diagnostics in applications that utilize chipsets that may not have a SATA interface.

Even if a host system has integrated SATA, many engineers find that eUSB modules are beneficial for storing configuration information and for providing a backup repository for data in DRAM in the event of a system-level power down.

Features

- 10-pin modules available in standard 2.54mm or low profile 2mm connector configurations
- Keys available in both short and long key configurations
- Standard and industrial temperature
- USB 2.0 and 3.0 compliant

Ordering Information

VTDUxxP(C/I)yyy(G/M)-zzz

where:

VTDUxxP= Virtium TuffDrive eUSB

(C/I) = Commercial/Industrial operating temp.

yyy = Capacity

(G/M) = Gigabyte / Megabyte

zzz = Virtium proprietary

Virtium manufactures memory and storage solutions for the world's top industrial embedded OEMs. For two decades we have designed, built and supported our products in the USA - fortified by a network of global locations. Our world-class technology and unsurpassed support provide a superior customer experience that continuously results in better industrial embedded products for our increasingly interconnected world.
