## WLA Series LED Area Lights

Banner Engineering is issuing notification regarding the replacement of all WLA Series LED Area Lights. Banner will launch the 2nd generation WLA-2 platform by 2023. Customers should begin transitioning to the new WLA-2 Area Lights as Banner will no longer accept new Sales Orders for the legacy WLA models after December 9, 2022.

The WLA-2 models are mechanically identical to the WLA's with the same housing and electrical connections, so they are drop-in compatible from an installation perspective with the legacy WLA's. The WLA-2's use the same amount of power but produce double the light intensity and there is an auxiliary wire on the WLA-2 to reduce the light intensity to WLA levels if needed.

See the table at the end of this notice for a list of the most common WLA models and the suggested WLA-2 replacement model for your reference.

Product Notification: WLA Series LED Area Lights

Please ensure all your sales teams are aware of this product notice and please work with your Banner regional sales teams regarding all your Lighting and other industrial automation engineering need

Thank You!
