Subject: Addendum to PIN 135258 - Qualification of JCET as an additional Test and Finish Location for Cypress Products

To: PCN ADMINISTRATOR CYPRESS PCN ADMIN pcn_adm@cypress.com

Change Type: Major

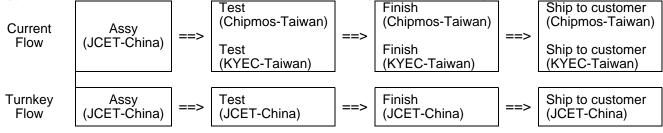

Description of Change:

Cypress released PIN 135258 to inform customers of the qualification done on package-level Test and Finish manufacturing operations at Jiangsu Changjiang Electronics Technology Co., Ltd (JCET) in China for Cypress products that are currently being assembled at JCET and tested at King Yuan Electronics Co., Ltd., (KYEC) Taiwan and ChipMOS Technologies Inc., Hsinchu, Taiwan. There will not be any changes to the tester platforms, test program coverage or methodologies. This addendum covers 221 additional parts that are being qualified for Test and Finish at JCET.

JCET is the largest provider of independent semiconductor manufacturing services in assembly and test in China. Their assembly facility in Changjiang, China is already a qualified assembly site for Cypress products. This qualification will enable these products to be assembled, tested, finished and shipped directly to Cypress customers from one subcontractor facility. This qualification will allow Cypress to leverage JCET's manufacturing expertise and quality focus. This in turn also provides the means for Cypress to continue to meet its customers' IC testing needs as well as delivery commitments in dynamic, changing market conditions. JCET is certified on several international quality standards: ISO / TS16949: 2009, ANSI/ESD S20.20:2007, IECQ QC 080000:2005, ISO14001 and OHSAS18001.

Benefit of Change:

This change will provide a turnkey solution for these products that are being manufactured in Cypress' subcontractors. This will provide a faster delivery of products to Cypress' customers.

Affected Part Numbers: 876 (655 from PIN135258 plus 221 from this addendum notice) Affected Parts: Please see the attached file for the list of parts affected by this notice.

Approximate PIN Implementation Date:

Implementation started in December 2013 and is expected to be complete by June 2014. Shipping directly from JCET to Cypress customers is expected to start in April 2014.

Anticipated Impact:

Products that will be tested at JCET China will be completely compatible with existing product from a functional, parametric, and quality performance perspective.

Cypress also recommends that customers take this opportunity to review these changes against current application notes, system design considerations and customer environment conditions to assess impact (if any) to their application.

Method of Identification:

Cypress maintains traceability of product to wafer level, including wafer fabrication location, through the lot number marked on the package.
