

Dear Distribution Partner,

Effective December 31, 2022, Hammond will discontinue production of the [1447S Type 12 disconnect enclosure](#) without door handle.

Over a number of years, we have seen the migration of our customers away from our 1447S series where an accessory door handle needed to be purchased and installed separately. There is NO CHANGE to our more convenient [1447SHK series](#) (Type 12 disconnect enclosure WITH pre installed door handle) which becomes the ideal substitute for former users of the discontinued series.

As per Hammond standard, the disconnect operating handle is still sold separately.

Hammond will be happy to issue an RMA for return of any 1447S series parts remaining in your inventory. Please contact your customer service representative for more information.
