#### Description for Product Change Notification

With the expansion of production capacities, the terminal design of the SPT 1,5 and SPT 2,5 series will be modified and the packaging size and packaging unit will be changed. Included with the PCN is file "CAA200001-Details packaging", which contains details of the packaging change. Also, included in this notice is two sample drawings of the SPT 2,5 series, comparing the old and the new terminal design.

In addition to these changes and as part of the ongoing improvement process, the solder pins will be completely tin-plated. The external dimensions of the terminal blocks, the PCB layout, the technical performance data, and the terminal-block approvals remain unchanged. These parts will be converted successively between January 2022 and January 2023. During this transition period, both the old and the new item versions will be delivered. The revision level (V/C) will change, shown in the attached spreadsheet titled Parts number list. Depending on local inventories, you can expect the new version of these parts no sooner than January 2022.
