Appendix 1
Reliability Engineering
Qualification Report

Qualification Project: E220202

Project Title: BridgeSwitch Unisem InSOP-24C Package Qualification**Qual Summary:**

Reliability testing was performed on BridgeSwitch product lots to qualify Unisem for assembly of the InSOP-24B package. The InSOP-24B is highly similar to the InSOP-24D which has been in production at Unisem for several years; qualification of the BridgeSwitch InSOP-24C was partially based on qualification data from the InSOP-24D and data from both packages are included here. All required reliability tests were completed with passing results. Yield analysis and assembly-level testing on BridgeSwitch products were completed with acceptable results. Based on these results, Unisem is qualified for assembly of all BridgeSwitch products in the InSOP-24C package.

Qualification Vehicles: BRD1267C, INN3368C, INN3168C, SC1933C
