Product Migration Notification Date: Feb. 15th, 2022

Dear Sunon Customer,

As a valued Sunon customer, you have our commitment to provide you with the highest quality customer service, product support and technologically advanced products. We pride ourselves in being a leading fan manufacturer, a goal that could not be achieved without customers like you.

Sunon is pleased to announce 000U series will be migrating to 1000U series. 000U products are no longer recommended for new designs; all new designs should start with 1000U series. 1000U series generally have lower power consumption, lower dB(A). The 000U items will be available for a last time buy date by the below schedule as well as last ship day.

As a valued Sunon partner, please cooperate with us to ensure a smooth transitional process. During this process, Sunon will do everything within our capability to make the migration as painless as possible. Not only will we be carrying additional inventory for the Top SKU consumed during 2021, we will also like a collection of your input to determine if extended part numbers are necessary prior to the year end. Please contact your designated Sunon representative or regional sales manager for further details on how to migrate current project or extend existing part number shelf life. We are very grateful for all your cooperation and appreciate your understanding as Sunon advances towards the global technical ideology.
