DESCRIPTION AND PURPOSE OF CHANGE:

As a datasheet information amendment, Würth Elektronik will correct the drawings showed. In the current version a circle in the bottom of the part was shown. It will be removed from the drawing as it has no influence in the mechanical characteristics of the part.

There will be no change in form, fit, function, quality or reliability of the product.

DETAIL OF CHANGE:

The previous datasheet shows a circle in the base of the part, used for the identification of the tooling. However, as this identification is not the only one we are using and has no influence or meaning in the mechanical dimensions of the part we decided to remove it.

RELIABILITY / QUALIFICATION SUMMARY:

There will be no change of the product, therefore no additional reliability or qualification testing will be performed.
