# Order Number 63808-2300

# Application Tooling Specification

#### **FEATURES**

- Applicator designed to industry-standard mounting and 135.80mm (5.346") shut height
- Quick setup time; plus, the crimp height, track and feed adjustments can be set without removing the applicator from the press
- Fine adjustment allows users to achieve target with little effort by adjusting in increments of .015mm (.0006") for conductor crimp height and .025mm (.001") for insulation height
- Independent adjustment rings allow users to quickly adjust the conductor or insulation crimp height without affecting each other
- Directly adapts to most automatic wire processing machines
- This applicator was designed for use in a wire processor only
- Fine adjustment of the bend is achieved using the bend adjust dial

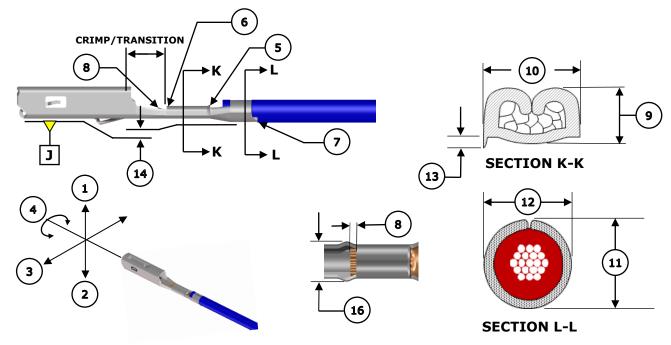

#### SCOPE

**Products:** MX150 Mat Seal/Unsealed Receptacle Terminals: 14 AWG, 16 AWG, 1.25mm<sup>2</sup> and 1.50mm<sup>2</sup> specific type wires below:

Terminal Series No.	Terminal Order	Wire Type and Size		Insulation Diameter		Strip Length (Ref.)	
	No.	Туре	Wire Size	mm	In.	mm	In.
33001 33012 34750	33001-3003 33001-3021 33001-5001 33001-5021 33012-3001 33012-3021 33012-5021 34750-1001	M1L-135A1 (UTX)	14 AWG

FA2 Crimp Applicator for MX150 Mat Seal/Unsealed Receptacle Terminals

	Wire Type	Wire Size	Minimum Force			
	M1L-135A1 (UTX)	14 AWG	180 N	40.5 lb.		
	M1L-123A4 (TXL)	16 AWG	120 N	27.0 lb.		
	JASO D611 (AVSS)	1.25mm <sup>2</sup>	176.5 N	39.7 lb.	To be measured with no	
Pull Force	MIL-126A1 FLR91X-A-XLPO EXRAD BLOCKED EXRAD UNBLOCKED	1.50mm²	150 N	33.7 lb.	influence from the insulation crimp.	
	PSA FTP 00949_10_00770		155 N	34.8 lb.		
13. Conductor Anvil Flash	0.1mm (.004") Max					
14. Insulation Grip Step	0.20-0.40mm (.008016") from Datum J					
15. Conductor Grip Step	0.00±0.10mm (.000±.004") from Datum J					
16. Crimp Bulge	L6. Crimp Bulge2.55mm (.100") Max within the crimp/transition area					

## NOTES

#### **Applicator Notes**

- This applicator is for automatic wire processor use only.
- This applicator does not include a cutting insert.
- Installing a cutting insert will cause jamming in this applicator.

#### **Specification Notes**

- It is very important that the brush length is consistently within specification for this sealed connector system to work properly.
- This applicator should only be run in a properly set up wire processor to consistently achieve the brush length.

#### **General Notes**

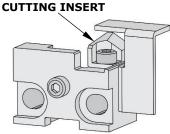

- 1. Molex recommends that an extra perishable tooling kit be maintained at your facility.
- 2. Verify tooling alignment by hand cycling the press and applicator before crimping under power. Check that all screws are tight.
- 3. Slugs, terminals, dirt and oil should be kept clear of the work area.
- 4. Wear safety glasses at all times.
- 5. For recommended maintenance, refer to the FA2 manual (TM-638080200).
- 6. Molex recommends crimping stranded copper wire only.
- 7. Lubrication must be used when crimping gold and select gold terminals to prevent terminals from sticking in the conductor punch. Use 63801-7240 oiler or equivalent.

## WARNINGS

**CAUTION:** This applicator must be installed in a press with a standard shut height of 135.80mm (5.346"). Tooling damage could result at a lower setting.

**CAUTION:** To prevent injury, never operate this applicator without the guards supplied with the press or wireprocessing machine in place. Reference the press or wire processing manufacturer's instruction manual.

**CAUTION:** Molex tooling crimp specifications are valid only when used with Molex terminals and tooling manufactured by Molex and sold by Molex or authorized distributors ("Molex Tooling"). When using tooling other than Molex Tooling with Molex-specific connector systems listed in our ATS documents, the Molex Tooling qualification does not apply, and the responsibility for full qualification of the connector system is that of the customer. Molex accepts no liability for connector performance or tooling support where tooling other than Molex Tooling is used or where Molex Tooling is modified.

 The Crimped Terminal Checking Aid (63868-2008) can be ordered separately if required. (This item is not included with the Applicator and is shown for reference purposes only.)

## ASSEMBLY DRAWING

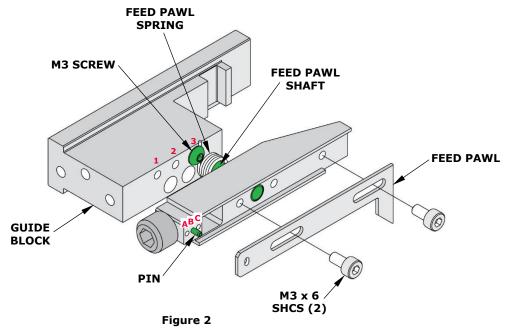

# FACTORY SETTINGS

#### Feed Pawl Assembly

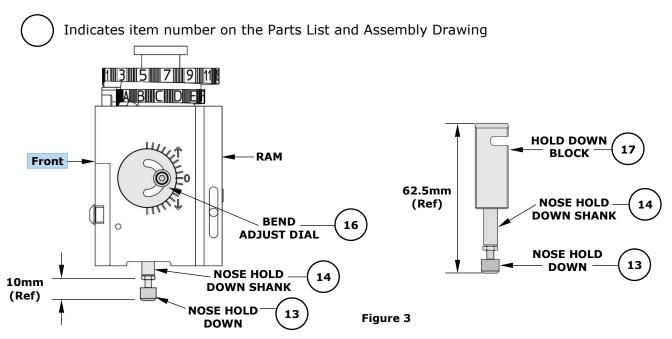

The FA2 applicator number 638082300 ships with the following factory settings. See Figure 2:

- The feed pawl shaft and M3 screw that holds the feed pawl spring are in position 3.
- The pin is in position B.

**Note:** Each applicator is configured and tested by Molex prior to shipping, and the above settings were used to produce the included sample crimps.

#### Third Dial/Ram Assembly

**Note:** The above dimensions were measured during setup and are included as a reference only. Additional adjustments may be required before crimping for production.

#### Mounting Datum Location

This applicator was assembled and tested by Molex with the mounting datum in the location shown in Figure 4. Do not remove the mounting datum.
