

## **Declaration of Conformity to EU RoHS Directive 2011/65/EU**

Pulse Electronics manufactures products at Pulse Operations or with selected Manufacturing Partners

Pulse Electronics 12220 World Trade Drive San Diego, CA, 92128 Tel: 858-674-8100

Part number: JXD1-0002NL

This is to certify that the parts/products listed above meet the requirements of the **RoHS Directive 2011/65/EU**. The following table lists the restricted materials and their respective allowable limits:

| <b>RoHS Restricted Substance</b>      | Allowable Limit         |
|---------------------------------------|-------------------------|
| Cadmium and its compounds*            | 100 ppm (0.01 weight %) |
| Mercury and its compounds             | 1000 ppm (0.1 weight %) |
| Hexavalent chromium and its compounds | 1000 ppm (0.1 weight %) |
| Lead and its compounds **             | 1000 ppm (0.1 weight %) |
| Polybrominated biphenyls (PBB)        | 1000 ppm (0.1 weight %) |
| Polybrominated diphenyl ethers (PBDE) | 1000 ppm (0.1 weight %) |

| If parts/products take advantage of any exceptions, please check which exemption(s):                          |
|---|
| 1. Mercury in single capped (compact) fluorescent lamps not exceeding (per burner):                           |
| (a) For general lighting purposes < 30 Watts  |
| $\Box$ (b) For general lighting purposes $\geq 30$ Watts and $< 50$ Watts                                     |
| $\Box$ (c) For general lighting purposes $\geq 50$ Watts and $< 150$ Watts                                    |
| (d) For general lighting purposes ≥150 Watts: 15 mg   |
| $\Box$ (e) For general lighting purposes with circular or square structural shape and tube diameter $\leq 17$ |
| mm  |
| (f) For special purposes: 5 mg  |
|   |
| 2a. Mercury in double-capped linear fluorescent lamps for general lighting purposes not exceeding             |
| (per lamp):   |
| (1) Tri-band phosphor with normal lifetime and a tube diameter < 9 mm (e.g. T2)                               |
| $\square$ (2) Tri-band phosphor with normal lifetime and a tube diameter $\geq 9$ mm and $\leq 17$ mm         |
| (e.g. T5)   |
| $\square$ (3) Tri-band phosphor with normal lifetime and a tube diameter > 17 mm and $\leq$ 28 mm             |
| (e.g. T8)   |
| $\Box$ (4) Tri-band phosphor with normal lifetime and a tube diameter > 28 mm (e.g. T12)                      |
| $\square$ (5) Tri-band phosphor with long lifetime ( $\ge 25,000h$ )  |
|   |
| 2b. Mercury in other fluorescent lamps not exceeding (per lamp):  |
| $\square$ (1) Linear halophosphate lamps with tube diameter > 28mm (e.g. T10 and T12): 10 mg                  |
| (2) Non-linear halophoshate lamps (all diameters): 15mg   |
| (3) Non-linear tri-band phosphor lamps with tube diameter > 17 mm (e.g. T9)                                   |
| (4) Lamps for other general lighting and special purposes (e.g. induction lamps)                              |

| 3. Mercury in cold cathode fluorescent lamps and external electrode fluorescent lamps (CCFL and EEFL) for special purposes not exceeding (per lamp):  ☐ (a) Short length (≤500 mm)  ☐ (b) Medium length (> 500 mm and ≤1500 mm)  ☐ (c) Long length (> 1500 mm)  |
|---|
| 4a. Mercury in other low pressure discharge lamps (per lamp)  |
| 4b. Mercury in High Pressure Sodium (vapor) lamps for general lighting purposes not exceeding (per burner) in lamps with improved color rendering index Ra > 60: $\square$ (I) $P \le 155$ W $\square$ (II) $155 < P \le 405$ W $\square$ (III) $P > 405$ W   |
| 4c. Mercury in other High Pressure Sodium (vapor) lamps for general lighting purposes not exceeding (per burner):   |
| <ul> <li>☐ 4d. Mercury in High Pressure Mercury (vapor) lamps (HMPV)</li> <li>☐ 4e. Mercury in metal halide lamps (MH)</li> <li>☐ 4f. Mercury in other discharge lamps for special purposes not specifically mentioned in Annex</li> </ul>  |
| <ul> <li>☐ 5a. Lead in glass of cathode ray tubes</li> <li>☐ 5b. Lead in glass of fluorescent tubes not exceeding 0.2% by weight</li> </ul>   |
| <ul> <li>☐ 6a. Lead as an alloying element in steel for machining purposes and in galvanized steel containing up to 0.35% lead by weight</li> <li>☐ 6b. Lead as an alloying element in aluminium containing up to 0.4% lead by weight</li> <li>☐ 6c. Copper alloy containing up to 4% lead by weight</li> </ul> |
| ☐ 7a. Lead in high melting temperature type solders (i.e. lead-based alloys containing 85% by weight or more lead)  |
| ☐ 7b. Lead in solders for servers, storage and storage array systems, network infrastructure equipment for switching, signaling, transmission, and network management for telecommunications  |
| ☐ 7c-I. Electrical and electronic components containing lead in a glass or ceramic other than dielectric ceramic in capacitors, e.g. piezoelectronic devices, or in a glass or ceramic matrix compound  |
| 7c-II. Lead in dielectric ceramic in capacitors for a rated voltage of 125 V AC or 250 V DC or higher 7c-III. Lead in dielectric ceramic in capacitors for a rated voltage of less than 125 V AC or 250 V DC  |
| <ul> <li>8a. Cadmium and its compounds in one shot pellet type thermal cut-offs</li> <li>8b. Cadmium and its compounds in electrical contacts</li> </ul>  |

| $\square$ 9. Hexavalent chromium as an anticorrosion agent of the carbon steel cooling system in absorption refrigerators up to 0.75% by weight in the cooling solution  |
|--|
| 9b. Lead in bearing shells and bushes for refrigerant-containing compressors for heating, ventilation, air conditioning and refrigeration (HVACR) applications   |
| 11a. Lead used in C-press compliant pin connector systems  |
| 11b. Lead used in other than C-press compliant pin connector systems   |
| 12. Lead as a coating material for the thermal conduction module C-ring  |
| <ul> <li>☐ 13a. Lead in white glasses used for optical applications</li> <li>☐ 13b. Cadmium and lead in filter glasses and glasses used for reflectance standards</li> </ul>   |
| 14. Lead in solders consisting of more than two elements for the connection between the pins and the package of microprocessors with a lead content of more than 80% and less than 85% by weight   |
| ☐ 15. Lead in solders to complete a viable electrical connection between semiconductor die and carrier within integrated circuit Flip Chip packages  |
| ☐ 16. Lead in linear incandescent lamps with silicate coated tubes   |
| ☐ 17. Lead halide as radiant agent in High Intensity Discharge (HID) lamps used for professional reprography applications  |
| 18a. Lead as activator in the fluorescent powder (1% lead by weight or less) of discharge lamps when used as specialty lamps for diazoprinting reprography, lithography, insect traps, photochemical and curing processes containing phosphors such as SMS ((Sr,Ba) 2MgSi2O7:Pb) |
| ☐ 18b. Lead as activator in the fluorescent powder (1% lead by weight or less) of discharge lamps when used as sun tanning lamps containing phosphors such as BSP (BaSi2O5:Pb)   |
| ☐ 19. Lead with PbBiSn-Hg and PbInSn-Hg in specific compositions as main amalgam and with PbSn-Hg as auxiliary amalgam in very compact Energy Saving Lamps (ESL)   |
| 20. Lead oxide in glass used for bonding front and rear substrates of flat fluorescent lamps used for Liquid Crystal Displays (LCDs)   |
| 21. Lead and cadmium in printing inks for the application of enamels on glasses, such as borosilicate and soda lime glasses  |
| 23. Lead in finishes of fine pitch components other than connectors with a pitch of 0.65 mm and less   |
| 24. Lead in solders for the soldering to machined through hole discoidal and planar array ceramic multilayer capacitors  |
| ☐ 25. Lead oxide in surface conduction electron emitter displays (SED) used in structural elements, notably in the seal frit and frit ring   |
| ☐ 26. Lead oxide in the glass envelope of Black Light Blue lamps   |

| 27. Lead alloys as solder for transducer hours at acoustic power levels of 125dB   | s used in high-powered (designated to operate for several SPL and above) loudspeakers |  |
|--|---|--|
| 29. Lead bound in crystal glass as de Directive 69/493/EEC   | fined in Annex I (Categories 1, 2, 3 and 4) of Council                                |  |
| ☐ 30. Cadmium alloys as electrical/mechanical solder joints to electrical conductors located directly on the voice coil in transducers used in high-powered loudspeakers with sound pressure levels of 100 dB (A) and more |   |  |
| ☐ 31. Lead in soldering materials in mercury free flat fluorescent lamps (which e.g. are used for liquid crystal displays, design or industrial lighting)  |   |  |
| 32. Lead oxide in seal frit used for mutubes   | aking window assemblies for Argon and Krypton laser                                   |  |
| ☐ 33. Lead in solders for the soldering transformers   | of thin copper wires of 100 μm diameters and less in power                            |  |
| 34. Lead in cermet-based trimmer po  | tentiometer elements  |  |
| 36. Mercury used as a cathode sputterin to 30 mg per display until 1 July 2010   | g inhibitor in DC plasma displays with a content up                                   |  |
| ☐ 37. Lead in the plating layer of high voltage diodes on the basis of a zinc borate glass body  |   |  |
| 38. Cadmium and cadmium oxide in oxide   | thick film pastes used on aluminium bonded beryllium                                  |  |
| $\square$ 39. Cadmium in color converting II-VI LEDs (< 10 $\mu$ g Cd per mm <sup>2</sup> of light-emitting area) for use in solid state illumination or display systems until 1 July 2014                                 |   |  |
