> Premium stainless steel resists most chemicals, salts and acids
$>$ Used in the chemical, pharmaceutical and electrical industries
$>80 \%$ anti-magnetic ( $20 \%$ magnetic due to weld during manufacturing)
> ESD handle versions discharge electrostatic energy through the handles in a gradual and controlled manner
$>$ Blunt tips offer a firm grip but won't damage surrounding components >928101 and 928104 have replaceable ESD tips (Conductive 102/103 OHM regarding DIN EN 61340-5-1)

920105
9251 01, 9551 02, 928101 and 928901
> 929101 has a cross over design

920106

929101

|  | Product <br> Number | Length | Width | Height | Finish | Style | Gripping <br> Surface | Tip (A) | Tip (B) |
