

Designed to splice two wires together quickly and easily, these splice connectors are perfect for splicing 19-26 AWG (0.91 - 0.40 mm) telephone wires. These splice connectors also feature the following:

- Self-stripping design, so no separate stripping needed
- Gel-filled cavity provides moisture resistance, and the housing is insulated to prevent accidental shocks
- Works with 19-26 AWG (0.91 - 0.40 mm) electrical or telephone wires with solid copper conductors
- Great for sensor and polarity wires
- Can be used to splice 2 or 3 wires of various sizes together
- Lifetime Warranty
