

Building on Laird's expertise with Nordic from the BL654 series comes the most powerful yet - the BL654 PA series! It provides OEMs with the maximum design flexibility and performance. A complete multi-protocol embedded wireless offering with exceptional processing capability, all with extended PA / LNA support for even greater range.

Powered by Nordic's nRF52840 silicon, the small form factor BL654 PA modules and DVKs provide for a secure, robust BLE and Cortex -M4F CPU for any OEM's product design. The BL654 provides you with maximum development flexibility with programming options for a simple, intuitive AT Command Set, as well as Laird's own *smartBASIC* environment.

The BL654 PA series brings out all nRF52840 hardware features and capabilities including **USB access**, up to **5.5V** supply considerations, and builds in additional TX power capabilities via an **integrated Skyworks PA**. Complete regulatory certifications enable faster time to market and reduced development risk completes Laird's simplification of your next Bluetooth design!
