

- UL Recognized
- Resin Coated, Heavy Weight Fiberglass Won't Burn, Melt Or Become Brittle
- Easy To Install-Cuts With Scissors
- Resists Gasoline And Engine Chemicals
- **Cut And Abrasion Resistant**

Scissor

Material Resin Coated Fiberglass

Grade FGN

Wall Thickness Refer to Chart

Resin Coated Fiberglass Protects To 1,200°F

INSULTHERM [®] (FG) is an extremely high temperature resistant sleeve commonly used as thermal protection for wires, cables and hoses that are subjected to continuous and extreme high temperature environments, such as engine manifolds and exhaust systems.

FG is braided from fiberglass yarns and coated with high temperature resins. FG is tough and durable, maintaining its tight structure under extreme vibration, abrasion, mechanical stress and temperature variations.

FG installs easily over a variety of applications to either deflect or retain heat in environments up to 1,200° F.

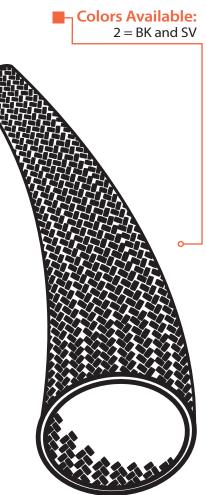

"...will withstand extreme heat... provides the protection needed"

Peter Mercier - Engineer Team Bucknum Racing www.bucknum.com

Colors Available:

Black (BK) and Silver (SV).
