## Ultra Low Profile 0404 Balun $50 \Omega$ to $50 \Omega$ Balanced

## Description

The BD2239N5050AHF is a low profile, low impedance sub-miniature
 unbalanced to balanced transformer designed for differential inputs and output locations on modern chipset applications in an easy to use surface mount package. The BD2239N5050AHF is ideal for high volume manufacturing and delivers higher performance than traditional ceramic baluns. The BD2239N5050AHF has an unbalanced port impedance of $50 \Omega$ and a $50 \Omega$ balanced port impedance. The output ports have equal amplitude ( -3 dB ) with 180 degree phase differential. The BD2239N5050AHF is available on tape and reel for pick and place high volume manufacturing.

Detailed Electrical Specifications: Specifications subject to change without notice.

| Parameter | ROOM $\left(25^{\circ} \mathrm{C}\right)$ |  |  |  |  |  |  |  |  |  |  |  | Unit |

## Mounting Configuration:

In order for Xinger surface mount components to work optimally, the proper impedance transmission lines must be used to connect to the RF ports. If this condition is not satisfied, insertion loss, Isolation and VSWR may not meet published specifications.

All of the Xinger components are constructed from ceramic filled PTFE composites which possess excellent electrical and mechanical stability having $X$ and $Y$ thermal coefficient of expansion (CTE) of $17 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$.

An example of the PCB footprint used in the testing of these parts is shown below. An example of a DC-biased footprint is also shown below. In specific designs, the transmission line widths need to be adjusted to the unique dielectric coefficients and thicknesses as well as varying pick and place equipment tolerances.

## Packaging and Ordering Information

Parts are available in reel and are packaged per EIA 481-D. Parts are oriented in tape and reel as shown below. Minimum order quantities are 4000 per reel.

| TABLE 1 |  |  |
| :---: | :---: | :---: |
| QUANTITY/REEL | REEL DIMENSIONS mm |  |
| 4000 | $\phi A$ | 177.80 |
|  | B | 8.00 |
|  | $\phi \mathrm{C}$ | 50.80 |
|  | $\phi \mathrm{D}$ | 13.00 |
