# SMD / SMT Chip Removal Alloy Lead-Free

Product Highlights Easily remove SMD parts with Chip Quik® removal alloy Reduce heat and reduce damage to circuit boards and SMD parts during removal Comes with SMDLT flux RoHS 3 and REACH compliant

#### **Specifications**

Alloy:Chip Quik® Alloy Lead-FreeAlloy Melting Point:79-91°C (174-195°F)Flux:SMDLT 2cc/2g Squeeze TubeFlux Type:No-CleanFlux Classification:REL0Flux Activation Temperature:100°C (212°F)

**REMKIT-NL** 

Chip Quik® Instructions		
	1	Apply Chip Quik flux to all leads of SMD with syringe or flux applicator.
	2	Melt Chip Quik low temperature alloy uniformly on all pins of SMD. Maintain alloy in molten state long enough for complete reflow.
	3	Lift chip from board with dental pick or vacuum pen.
	4	Thoroughly clean site with swab dipped in flux while applying heat. Clean thoroughly with alcohol pad.

#### **SMD Removal**

### (With solder iron or warm air bath)

- Apply flux to all leads.
- Melt CHIP QUIK® uniformly on all pins.
- Maintain alloy in molten state long enough to release chip.
- Lift chip from board with dental pick or vacuum pen.

## **CLEAN UP**

- While molten, use cotton swab and flux to move excess to an unused section of board.
- While applying heat, polish each pad with a swab and flux until thoroughly clean.
- At room temperature, clean residue with alcohol pad.
- You are now ready to install the new chip.

#### 5-6.5" Sticks of Chip Quik® material, removes 1,250 to 1,500 SMD pins.

Conforms to the following Industry Standards: J-STD-006C, Amendments 1 & 2 (Solder Alloys and Fluxed/Non-Fluxed Solders): RoHS 3 Directive (EU) 2015/863:

Yes Yes
