

■ Features :

- DC/DC step-up converter
- Constant current output : 350mA to 1050mA
- Wide output LED string voltage up to 126VDC
- High efficiency up to 95%
- PWM + analog dimming and remote ON/OFF control [(Blank) type or W type]
- DALI dimming [(Blank)DA type or WDA type]
- Protections: Short circuit / Over voltage / Under voltage
- Cooling by free air convection
- Fully encapsulated
- 3 years warranty

NOTE	 All parameters are specified at normal input(12VDC,24VDC), rated load, 25°C 70% RH ambient. (Blank) type and W type output voltage must step up by 3 Volts from input DC voltage; (Blank)DA type and WDA type output voltage must step up by 12 Volts from input DC voltage. Ripple & noise are measured at 20MHz of bandwidth by using a 12" twisted pair-wire terminated with a 0.1uf parallel capacitor. ■ Derating Curve

■ Static Characteristics

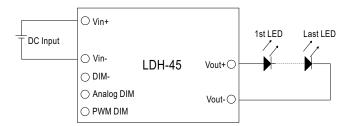

■ Standard Application

* Operation without dimming:

 ${
m IO}$ operates at rated current without dimming function when the pins of analog DIM and PWM DIM keep open

* PWM Dimming Control (non DA type):

Io adjustment by PWM Signal

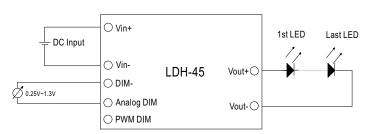

During PWM dimming operation, Io will change with the PWM duty (PWM Signal: $1K\sim10KHz$)

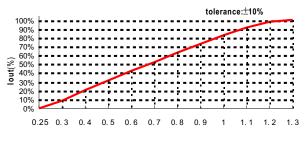

Note: DALI dimming curve refer to 10KHz curve

※ Analog Dimming Control (non DA type):

Io adjustment by DC voltage

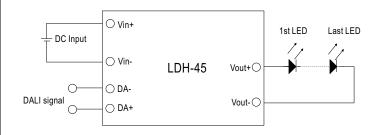

During analog dimming operation, Io will change with DC input voltage

Analog voltage (V) 12VDC input&24VDC input, full load

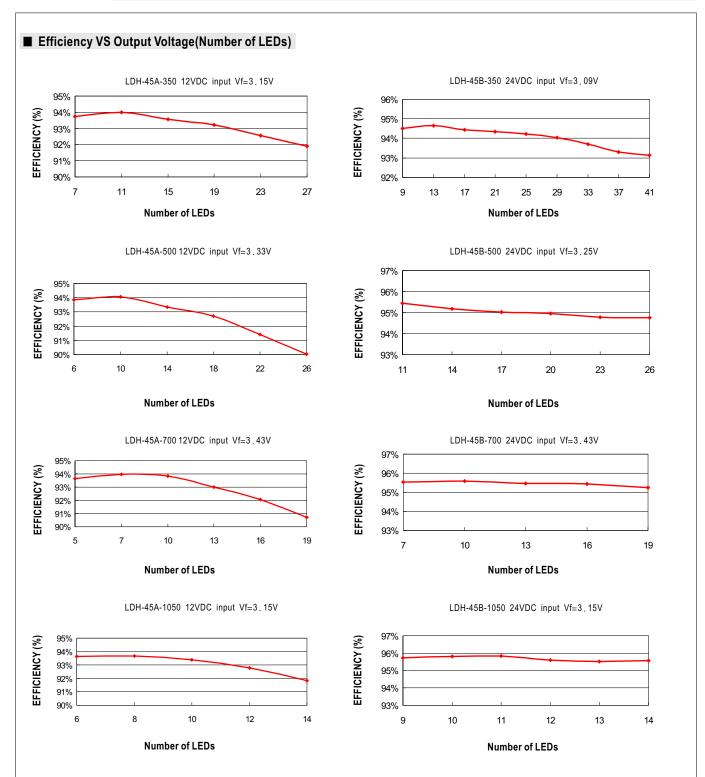

★ DALI Dimming Control (DA type only):

Io adjustment by DALI signal

- DALI protocol including 16 groups and 64 addresses.
- Min. dimming level is about 8% of output.

Application Notes:

- 1. The positive and negative input terminals must be connected correctly and negative voltage can not be input to avoid damage to the power supply.
- 2. Due to the large input current, please pay attention to the voltage drop of the wiring, to ensure the power supply to work properly.
- 3.At dim off,LDH output voltage will drop to the same level as input voltage. To get luminaires complete dark, please make luminaires are light off when they are driving by the input voltage.

■ Application Notes of EMC

- 1. If LDH-45 is powered by a battery, comply with BS EN/EN55015 without additional Input filter and capacitors.
- 2. If LDH-45 is powered by DC Bus, additional EMC filter parts shall be added to meet BS EN/EN55015. The recommended circuit is shown in Figure 1
